**DETAILED ACTION**

***Information Disclosure Statement***

Documents listed in the IDS submitted on 8/14/08 have been considered.

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ariel Rogson (Reg. no. 43,054) on 11/13/08-11/14/08. The amendment is to prevent an interpretation of the claims not intended, which makes the claims allowable over the prior art. The examiner also confirmed with Mr. Rogson that with respect to claim 95 and its dependent claim, "computer-readable media" is not meant to encompass signals, only statutory media such as RAM, ROM, hard disks, and other physical media. The examiner also received assistance from Mr. Rogson in identifying passages in the priority applications which contains support for the amendments submitted on 8/14/08. Thanks to Mr. Rogson's assistance, the examiner was able to determine that the claimed subject matter has full support back to application 08/345,523, now US patent 5,615,277, filed on 11/28/1994. As such, the effective filing date of the claimed subject matter of this current application is 11/28/94. As per MPEP 713.04, a separate interview summary form is not provided because the substance of the interview has been summarized herein.

The application has been amended as follows:

**AMEND THE FOLLOWING CLAIMS AS FOLLOWS:**

Art Unit: 2435

60. (currently amended) A computer-implemented biometric identification method, comprising:

receiving a biometric sample from an individual;

locating a set of currently stored registration biometric samples, wherein at least two of the currently stored registration biometric samples in the set are provided by two different individuals respectively;

comparing the received biometric sample with at least one currently stored registration biometric sample in the set of currently stored registration biometric samples to find a match;

transmitting a confirmation of the match;

identifying at least two accounts associated with the individual in response to the match; and

transmitting information about the at least two accounts associated with the individual.

67. (currently amended) A computer-implemented biometric identification method, comprising:

receiving a biometric sample from an individual;

locating a set of currently stored registration biometric samples, wherein at least two of the currently stored registration biometric samples in the set are provided by two different individuals respectively;

comparing the received biometric sample with at least one currently stored registration biometric sample in the set of currently stored registration biometric samples to produce an evaluation; [[and]]

transmitting the evaluation;

identifying at least two accounts associated with the individual in response to the evaluation; and

transmitting information about the at least two accounts associated with the individual.

95. (currently amended) Computer-readable media storing software to implement the method of:

receiving a biometric sample from an individual;

locating a set of currently stored registration biometric samples, wherein at least two of the currently stored registration biometric samples in the set are provided by two different individuals respectively;

comparing the received biometric sample with at least one currently stored registration biometric sample in the set of currently stored registration biometric samples to find a match;

transmitting a confirmation of the match;

identifying at least two accounts associated with the individual in response to the match;  
and

transmitting information about the at least two accounts associated with the individual.

The following is an examiner's statement of reasons for allowance: As per claims 60, 67, 76, and 95, the prior art does not disclose comparing received biometric samples with stored samples to find a match/produce an evaluation and based on the match/evaluation, identifying at least two accounts associated with the individual and transmitting the information about the at least two accounts associated with the individual. Note that the effective filing date of the claims goes back to 11/28/94 and in the prior art, a received biometric sample is used to access one account associated with an individual rather than as recited in the claims where at least two

Art Unit: 2435

accounts is identified based on the evaluation/comparison of the received biometric sample and transmitting information related to the at least to accounts identified.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PONNOREAY PICH whose telephone number is (571)272-7962. The examiner can normally be reached on 9:00am-4:30pm Mon-Thurs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Vu can be reached on 571-272-3859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
